

Assisted Living

The Villa offers 21 private assisted living suites, each with a kitchenette, living area, private bath, and peaceful views. Daily room rates include three nutritious meals, activities, fitness and wellness care, spiritual services, laundry, housekeeping services, 24-hour assistance with personal care, and medication management.

Depending on the level of assistance required (based on a clinical assessment) and personal interest, some additional fees may apply. Additional services available include rehabilitation on-site, and transportation for off-campus appointments, personal training, and massage therapy.

The Villa encourages a rich social life both on-site and off with everything from bingo, crafts, and movies, to trips, outings, and family picnics. Our goal is to enable our residents to maintain their sense of purpose and pride in their abilities.

New! Assisted Living has expanded to include a dedicated memory support neighborhood of 27 private rooms. These rooms are located in a secure, home-like environment that provides specialized care for those facing memory challenges, including dementia and Alzheimer's disease. The memory support care team addresses each resident's individualized needs in a compassionate, supportive manner. We offer engaging activities around-the-clock to create and maintain a pleasant and positive atmosphere.

Private assisted living suites are spacious and offer open floor plans with plenty of natural light.
